- ✓ **Quick and comprehensive**

Who are these aimed at?

A1/A2/B1/B2/C1 learners

Do you need to find out your English level based on the **CEFR** scale for a work project? Are you an HR manager looking to **map out English competencies** in your company? Or are you a **hiring manager** looking for **candidates** with a particular **level of English**?

With our **LSAT** (Language Skills Aptitude Test), you can find out your specific language level according to the CEFR scale. We will test your **language** and **grammar** skills as well as your **speaking abilities**.

If this isn't exactly what you are looking for, our team of experts can help create English tests to meet your specific needs.

Needs Analysis (the learners professional environment)

With a certified teacher, the learner defines the context & frequency of English language use in their workplace, their motivation to improve & any specific expectations in connection with their professional goals.

Writing Analysis (the learners writing skills)

The learner writes a short text in a limited amount time. Then one of our certified teachers analyses the grammar & vocabulary to determine the level of a learner's written production.

iTest (adaptive testing of the learners language level)

The test pulls questions from our database & displays them based on the learner's responses, intelligently adapting the difficulty of the test for an accurate level analysis.

Oral assessment (the learners speaking skills)

The test lasts approximately 15-20 minutes & is booked by the learner according to their availability. This is an informal, relaxed call that happens online so that you can do it at your ease, wherever and whenever.
